

State Route 84/Interstate 680 Interchange Improvements

MAY 2024

PROJECT OVERVIEW

Alameda CTC, in cooperation with the California Department of Transportation (Caltrans) and the Federal Highway Administration (FHWA), is conforming State Route 84 (SR-84) to expressway standards between south of Ruby Hill Drive and the Interstate 680 (I-680) interchange in southern Alameda County by:

- Modifying SR-84 to accommodate one additional lane in each direction.
- Implementing additional improvements to reduce weaving/merging conflicts and help address the additional traffic demand between I-680 and SR-84.

The project would also improve the SR-84/I-680 interchange operations by:

- Modifying ramps.
- Extending the existing southbound I-680 high-occupancy vehicle/express lane northward by ~2 miles. Currently, the southbound express lanes extend from SR-84 south of Pleasanton to SR-237 in Milpitas.

Upon completion, this project will be the final segment in a series of improvements to bring SR-84 to expressway standards from I-680 in Sunol to I-580 in Livermore.

PROJECT NEED

- SR-84 is congested during peak commute times.
- Interchange congestion affects operations of both SR-84 and I-680 and is projected to worsen.
- Collision rates on SR-84 and the interchange are higher than the state average, and access to SR-84 from driveways and local roads is difficult.
- The undivided roadway and uncontrolled access on SR-84 do not meet expressway standards.

PROJECT BENEFITS

- Improves regional connectivity
- Improves interregional connectivity
- Relieves congestion
- Improves safety

I-680/SR-84 interchange.
